Posted on May 20, 2022 by Rich Johnston | The Matrix Comics are a group of short stories, comics and pin-ups set in the Matrix universe. Originally published in 1999 on the Matrix website, ahead of and alongside the original The Matrix movie, a selection of which later published in a series of print volumes published by the Wachowskis' company Burlyman Entertainment. The comics aimed to expand the history and impact of the world on its dreaming population. Three years ago, a 20th-anniversary hardcover collection collected almost all of them, including some strips that had never been seen before, 400 pages worth. The Matrix Comics: 20th Anniversary Edition was a big seller at \$40, sold fast and went out of print. Copies have sold recently on eBay for over \$200. Well, in August, to follow the new movie, the Wachowskis are sending The Matrix Comics: 20th Anniversary back to print for \$50 each. Though they do say that limited copies are available, so you might want to have a word with your local comic book shop sooner rather than later, if you don't want to miss out this time. Volume 1 Cover Volume 2 Cover 20th Anniversary Edition Cover The Matrix Comics refer to a group of short stories, comics and pin-ups set in the Matrix universe. They were originally published on the official Matrix website from 1999 to 2003 as three series of webcomics with additional pieces of artwork, most of which were later collected into two volumes, published by the Wachowskis' company Burlyman Entertainment along with three comics never released on the internet. In 2019, all previously released comics were reprinted in a single-volume collection, over 400 pages long: The Matrix Comics: 20th Anniversary Edition (with two minor exceptions, both webcomics which were never released in print form). It also included four comics that weren't included in either of the previous two hardcover collections. For a full listing of all extant comic stories see the article for that collection. Publication History[] The comics' editor was Spencer Lamm. The Wachowskis contributed one script to the project, Bits and Pieces of Information, aspects of which were later included in The Animatrix short animated film The Second Renaissance. In addition, a number of the comics were printed individually in comic books: The Matrix: Comic Book Preview, featuring Déjà Vu which was to have been given out at the release of The Matrix in 1999 A comic book was made by David Lapham for Free Comic Book Day 2002 which was reversible, having There Are No Flowers in the Real World on one side and Stray Bullets #2 on the other A preview comic book of The Matrix Comics Volume 1 which included only The Miller's Tale was printed for San Diego Comic Con 2003 and was also given away free to everyone who pre-ordered the volume The Matrix Comics: 20th Anniversary Edition is the first hardbound collection for the comics and includes all Matrix stories from the first two volumes together with four previously unprinted stories.[1] The four new-to-print stories are: Unprinted Comics[] The comic Morning Sickness was not included in any of the printed collections. The comic The Man Who Knew Too Much was initially published on the official Matrix website but was later silently deleted for unknown reasons. This comic is yet to be republished in print nor online. Pin-ups[] As well as comic strips there were a number of pieces of high quality artwork called pin-ups which were generally made by the artists for one of their own stories in a series. These were often released as a preview of the comic before it was available on the website.
